Exceptional Investment Plot with Panoramic Sea Views in Santa Bárbara de Nexe

This is an exceptional plot in Santa Bárbara de Nexe, offering breathtaking panoramic views, including spectacular sea views. It represents a unique investment opportunity, as the plot has the potential to be subdivided into five separate plots. The subdivision process is already underway with the Town Hall and is pending approval, which would allow the construction of five beautiful villas, each with sea views and a south-facing orientation.

At present, the project is being sold as a single plot, but once approved, the plots can be sold individually, offering excellent flexibility for investors. No pre-approved building permits have been submitted, giving buyers full freedom to design their dream properties.

The plot benefits from easy access and a prime location, just a five-minute walk from Algarve's largest shopping center, Mar Shopping, and a short drive from Loulé city center. Faro Airport is only
